

WIX1002 FUNDAMENTALS OF PROGRAMMING ASSIGNMENT

A. Problem specification

Your company has received several new projects this month. All these projects are equally important, with certain level of technical difficulties and challenges. You have been instructed by the CIO to lead a team of 5-6 members, to handle one of the projects. You have to complete the project and prepare a presentation. Have fun and be creative! You will eventually reflect and be impressed by your own work! All the best!

B. Group formation

1. Form a team of 5-6 members (**same Occ only**) to do the project. (see [FoP Grouping S1-25-26.xlsx](#) for team registration)
2. Every team member must contribute to the project, including certain amount of coding. The role played by and contribution of each member to the project must be included in the managerial report.
3. There are 6 assignment topics. Choose one that you find interesting. Fill in your 'Group Name' and *Topic* that you are interested to work on by Week 4 (3 Nov 2025, 2359) in [FoP Grouping S1-25-26.xlsx](#). (Login to Ms Teams before assessing the link). Since everybody can edit the file, please avoid changing data already input by other students. Do not change the number of students assigned to each group, or you will be randomly assigned to other groups.

C. Submission

1. A technical report explaining the assigned project, the requirements of the project, the approach taken to solve the task, a detail description of your solution (includes the flow-chart, modules, etc.), sample snapshot of your program output.
2. A managerial report explaining the formation of the team, role and assigned work for each of the members, the project timeline, the problems faced in accomplishing this assignment and your solutions, and other issues arise.
3. The complete source code.

D. Important dates:

1. **Submission:** (Week 13) - **Monday, 12th January 2026, 2359. (via Spectrum)**
2. **Presentation:** (Week 14) during lecturer/tutorial and lab session (Depends on lab lecturer)

E. Marking scheme: (15 marks)

1. Source code/Program. (12 marks)
 - a) Meeting the basic task requirements, i.e. identify the requirements of the project and produce a workable solution – 8 marks
 - b) Extra features/functionalities – 4 marks.
2. Report (3 marks)

Plagiarism is strictly PROHIBITED. You will be penalised if your codes are found online or similar to other groups (within/between Occs). Use LLMs responsibly. Failure to showcase project ownership may result in strict penalty.
